

Introduction

The Atlona **AT-VCC-IR3-KIT** is an accessory for the Atlona Velocity Control System that provides conversion from IP control commands to infrared. This Velocity Control Converter is very compact and can be placed anywhere a device requires control and is not IP-capable. The VCC-IR3-KIT is remotely powered through Power over Ethernet (PoE), or locally from a USB power source. The primary unit installs onto any surface via a convenient mounting dock. A simple “click” locks it into place for a secure, reliable installation. The included cable provides three independently addressable emitters allowing discrete IR control for three different AV devices.
