DESCRIPTION

This system is designed for small- and mid-sized venues. The vertical dispersion selection by means of the system-integrated filter (30°/45°) makes it possible to control the system's dispersion lobe in the vertical plane and thus reduce the reverb, improving intelligibility in spaces such as cultural centers, museums, conference rooms...all while delivering superb music reproduction.

The aluminum structure and the IP-66 kit make it a highly reliable and resistant choice, available in any RAL color.
