- Leaflet "USING THE UNIT SAFELY"

Connecting to a Windows 10 Computer

If you're using Windows 10, access the following URL to check the latest information.

➡ http://roland.cm/rubix/

Connecting to a Windows 8.1 / Windows 8 / Windows 7 Computer

If you're using this product with Windows 8.1, Windows 8, or Windows 7, install the driver

In order to use this product, you must download and install the driver.
For details on installation, refer to "Installing the USB Driver (Before Using the Product for the First Time)" and "Connecting to a Computer".

NOTE

Install the driver before connecting this product to your computer. If you've already connected this product to your computer, temporarily disconnect it before you proceed.

Installing the USB Driver (Before Using the Product for the First Time)

1. With the Rubix22 / Rubix24 / Rubix44 not connected, start up your computer.

2. Download the USB driver from the Roland website, and begin the installation as directed below.

Roland Website
http://roland.cm/rubix/

1. Download the latest USB driver

2. Doubleclick

"rubix_wind_v***.exe" file
*** indicates the version number.

3. Follow the on-screen directions to install the USB driver.
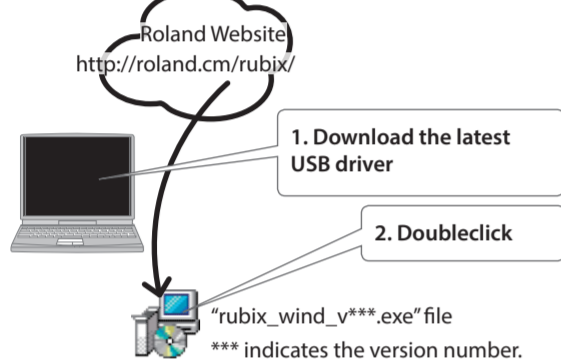

NOTE

Don't connect the Rubix22 / Rubix24 / Rubix44 to your computer until USB driver installation has ended.

MEMO

- If a Windows security dialog box appears, click the [Install] button.
- If an "Install software" dialog box appears, click the [Continue] button.
- If any other message appears, proceed as directed by the message.

4. As described in "Connecting to a Computer" below, connect the Rubix22 / Rubix24 / Rubix44 to your computer.

Connecting to a Computer

After you have finished installing the USB driver in your computer, connect the product to your computer as follows.

* Once everything is properly connected, be sure to follow the procedure below to turn on their power. If you turn on equipment in the wrong order, you risk causing malfunction or equipment failure.

* Before turning the unit on/off, always be sure to turn the volume down. Even with the volume turned down, you might hear some sound when switching the unit on/off. However, this is normal and does not indicate a malfunction.
MEMO

After you install the USB driver and connect the Rubix22 / Rubix24 / Rubix44 to your computer for the first time, it might take several minutes before the Rubix is ready to use.

Rubix22 / Rubix24 users
* The illustration shows the Rubix22

1. Set the [POWER SOURCE] switch to the USB port side.

2. Connect the USB cable.

Rubix44 users

1. Connect the AC adaptor
Place the AC adaptor so the side with the indicator (see illustration) faces upwards and the side with textual information faces downwards. The indicator will light when you plug the AC adaptor into an AC outlet.

To outlet
Power cord   Indicator

2. Turn the [POWER] switch "ON"

3. Connect the USB cable

Connecting to a Mac

* Once everything is properly connected, be sure to follow the procedure below to turn on their power. If you turn on equipment in the wrong order, you risk causing malfunction or equipment failure.

* Before turning the unit on/off, always be sure to turn the volume down. Even with the volume turned down, you might hear some sound when switching the unit on/off. However, this is normal and does not indicate a malfunction.
If you're using a Mac, you don't need to install a USB driver.

Rubix22 / Rubix24 users
* The illustration shows the Rubix22

1. Set the [POWER SOURCE] switch to the USB port side.

2. Connect the USB cable

Rubix44 users

1. Connect the AC adaptor
Place the AC adaptor so the side with the indicator (see illustration) faces upwards and the side with textual information faces downwards. The indicator will light when you plug the AC adaptor into an AC outlet.

To outlet   Indicator
Power cord

2. Turn the [POWER] switch "ON"

3. Connect the USB cable

Connecting to an iPad

* Once everything is properly connected, be sure to follow the procedure below to turn on their power. If you turn on equipment in the wrong order, you risk causing malfunction or equipment failure.

* Before turning the unit on/off, always be sure to turn the volume down. Even with the volume turned down, you might hear some sound when switching the unit on/off. However, this is normal and does not indicate a malfunction.
If you're using an iPad, you don't need to install a USB driver.

Rubix22 / Rubix24 users
* The illustration shows the Rubix22

1. Connect the USB AC adaptor (or mobile battery) using a USB micro-B type ↔ A type cable (all commercially available items).

Apple Inc.'s Lightning to USB Camera Adapter (sold separately)

Input / Output Device Settings

In the DAW application that you're using, make settings for playing and recording audio and MIDI. For details on how to make these settings, refer to the owner's manual of your DAW application.

Audio Driver	Audio Input Device / Audio Output Device
MME, WDM/KS	IN (Roland Rubix22) / OUT (Roland Rubix22) (*1)
ASIO	Roland Rubix

(*1) Select the model of Rubix that you're using.

MEMO

The Rubix22 / Rubix24 / Rubix44 support sampling frequencies of 44.1 kHz, 48 kHz, 96 kHz, and 192 kHz.

MIDI Input Device / MIDI Output Device
Roland Rubix22 (*2)

(*2) Select the model of Rubix that you're using.

Check Whether You Hear Sound

1. As shown in the illustration, connect your headphones or amplified speakers.

Headphone   Computer   Amplified speakers

Front panel   Rear panel

2. If you're using the Rubix24, turn the [DIRECT MONITOR] knob all the way to the left.
OS Settings

Windows

1. Open "Control Panel," click the [Hardware and Sound] icon, and then click the [Sound] icon.
If you're using the icon view or the classic view, double-click the [Sound] icon.

2. Click the [Playback] tab, choose Rubix22 / Rubix24 / Rubix44 [OUT], and click the [Set as default] button.

3. Click the [OK] button.

Mac OS

1. Open "System Preferences," and click the [Sound] icon.

2. Click the [Output] tab, and select [Rubix22] (*3).
(*3) Select the model of Rubix that you're using.

3. When you have finished making settings, close "System Preferences."

Windows

3. Open "Control Panel," click the [Hardware and Sound] icon, and then click the [Sound] icon.
If you're using the icon view or the classic view, double-click the [Sound] icon.

4. Right-click Rubix22 / Rubix24 / Rubix44, and then click [Test] to check the sound.

Mac OS

3. Open "System Preferences," and click the [Sound] icon.

4. [Output] tab → From "Select a device for sound output," click Rubix22 / Rubix24 / Rubix44.

5. [Sound Effects] tab → Set the "Play sound effects through" to the "Selected sound output device."

6. Click the [Alert volume] slider and check the volume.

Troubleshooting

Problem	Items to Check	Action
I can't download the driver because I can't connect to the internet.	If you have another computer that can connect to the internet, you can save the downloaded driver on a USB flash drive and use that for installation.	
Can't use the Rubix with Windows 10.	For details on how to install the USB driver in Windows 10, and to obtain the latest information, please access the following URL. ➡ http://roland.cm/rubix/	
The installer does not exit	Does the user who is signed in to Windows have "administrator" privileges?	A user who has "administrator" privileges must sign in and install the driver. For details, refer to the administrator of your computer.
	Could other software be running, or software (such as anti-virus) be running in the background?	Close other software before installing the driver.
Won't start, isn't detected.	Is the Rubix's power indicator off or flash?	Make sure that the Rubix is connected to the computer correctly. If that does not resolve the issue, reinstall the USB driver.
	Is the [POWER SOURCE] switch set to the correct position?	If the unit is connected to a computer, set the [POWER SOURCE] switch to "USB." If the unit is connected to an iPad, set the switch to the "5V DC" position.
	Could you have connected this unit to a bus-powered USB hub (a USB hub that does not use a AC adaptor)?	Connect this unit to a self-powered USB hub (a USB hub that uses an AC adaptor).
	In the "Device Manager," do you see "Other device," "Unknown device," or a device for which "?," "!," or "x" is displayed?	Reinstall the USB driver.
No sound even if you raise this unit's volume.	Could the speaker volume be lowered?	If your speakers have a volume control, raise the volume.

This document explains the specifications of the product at the time that the document was issued. For the latest information, refer to the Roland website.
